The intent of this project is to complete improvements to the water and stormwater system in the Tower Avenue Sewer Separation Area. We will install new water main and storm water pipes, new catch basins and manholes as well as perform restoration work at the end of the project.

We understand that these actions may impact your daily activities so keeping YOU informed is an essential component to the success of our work.

We encourage you to attend the meeting on May 14th to share your comments and ideas, meet the project managers and learn about the work planned in your neighborhood. Hope to see YOU there.
